Without a doubt though, our biggest news is the introduction of a **Waste & Overflow Rough-In & Trim Kit program**. The **RI&T** program allows you to stock ABS Clicker™ and Cable-Drive® Rough-In and Trim Kits separately in today's most popular finishes, maximizing your options while minimizing your SKU count. Turn to the first two pages of the Waste & Overflow Section in your new catalogue for the complete details...

Please note that availability will vary on these new products during the 1st quarter of the year. Please call us to check availability.

Finally, you spoke, and we listened! You asked for toll free telephone and fax numbers, and now we have them:
